

Safety Tips for Leon County Hazardous Waste Center

Autumn 2014: Label It

For many reasons, hazardous materials are often put into different containers. It might be a pesticide mix in a spray bottle or to replace a damaged container. However, memories are not perfect. So, for your safety and that of the Hazardous Waste Center staff, please label the container. Simple, bold and clear should be your guide. Don't just write "bug spray" on a jar, or even the trade name, write down the main ingredient. It will help you remember, and will help us to safely sort and dispose of your material
